

HI-LEX

PTCA Guidewire

Characteristics

Tip load 0.5g

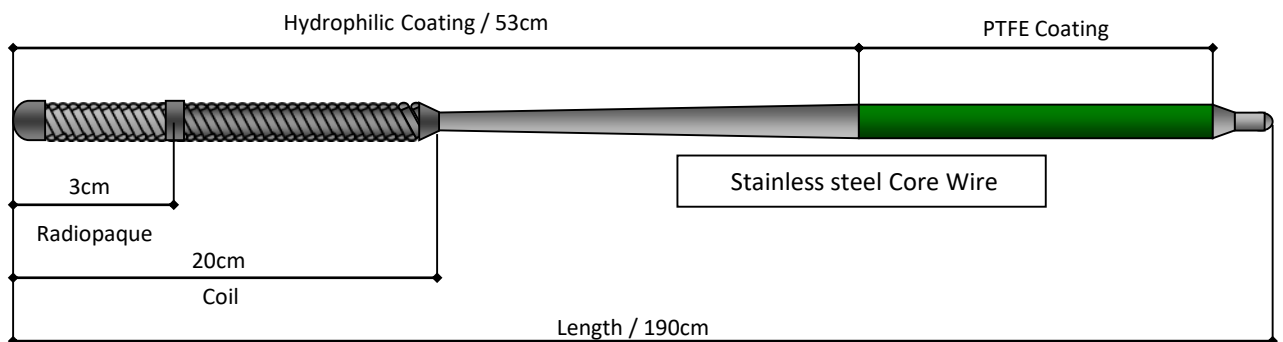

Tip shapeable in anyway

Improved durability of stainless core wire minimizes irreversible shaft bend

Excellent torque response realized by unique core wire drawing and straightening technology

Optimum support necessary for device delivery

Pure PTFE coat improves lubricity with compatible devices

Product Number	Length	Radiopaque Length	Flexibility	Diameter
HLGW-V	190cm	3cm	Floppy	0.014" (0.36mm)

Products : PTCA Guide wire

- Approval No. : 21600BZZ00591000
- Medical Device Class : Highly Controlled Medical Device
- Generic Name : Guide wire for Heart and Central Cardiovascular System Catheter

- Sterilized by Ethylene Oxide Gas
- Reuse Prohibited
- Re-sterilization Prohibited
